1

GOOD DIVERSIFICATION BY GEOGRAPHY

WITH A FLEET ESSENTIALLY LOCATED IN DEVELOPED EUROPEAN COUNTRIES

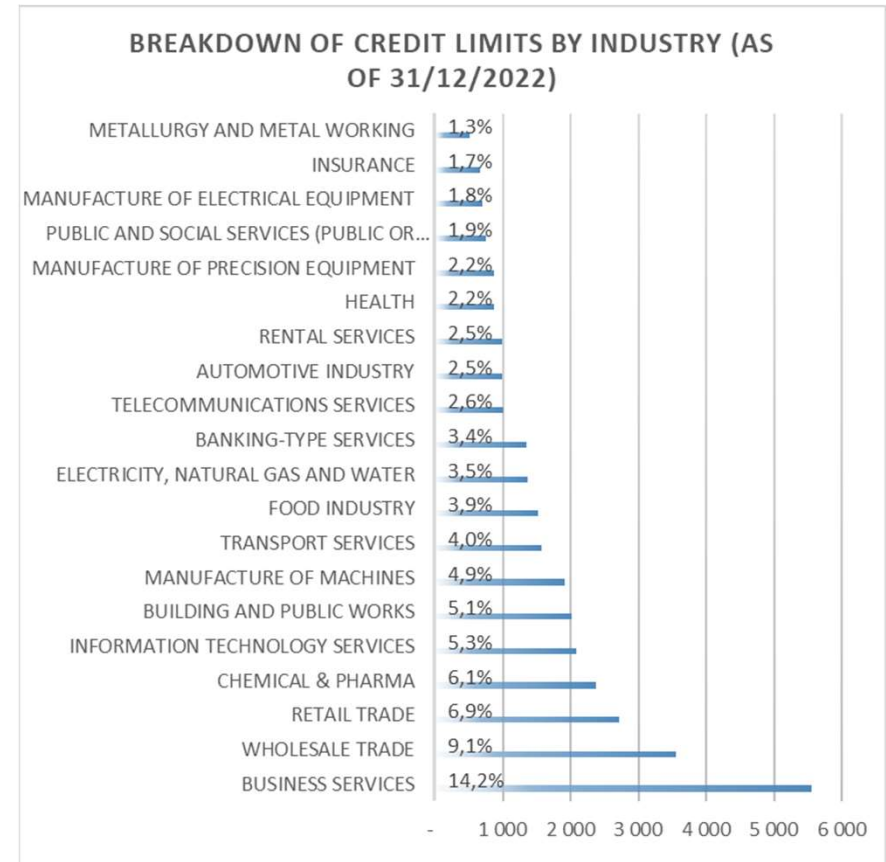

- 90% of the fleet is currently located in Developed European economies
- Our Full Service Leasing strategy centers on new cars being leased in Developed markets

1

GOOD DIVERSIFICATION BY CLIENTS AND INDUSTRY

- 30 000 Corporate clients and 270 000 Retail clients
 - Top 10 Business Groups (excl BNPP) represent only 7.7% of total exposure
 - Top 20 Business Groups (excl BNPP) represent 11.7% of credit exposure
- Arval portfolio is well diversified by industry
- No industry segment exceeds 14.2% of the portfolio.
- Sensitive industries only represent a very small part of the portfolio

1

GOOD DIVERSIFICATION BY OEMS AND OTHER SERVICE SUPPLIERS

- Strong diversification by OEM (PSA, Renault, VW, FCA, Ford, BMW, Daimler, Nissan, AUDI, Skoda, Seat...) with no OEM representing more than 25% of the fleet
- Relationship with OEM's are good: Arval is a very significant buyer of vehicles (>400 000 vehicles ordered per year)
- Good diversification with tyre manufacturers
 - Michelin, Continental, Goodyear, Pirelli, Bridgestone...
- Arval negotiates directly with the tyre manufacturers
 - Prices from tyre manufacturers depend on volumes
 - There are no minimum purchase requirements
- For Service, Repairs & Maintenance, Arval has local agreements with local networks or works with garages
 - Situations and number of networks can be different depending on countries
 - Costs for service, repair and maintenance are monitored closely

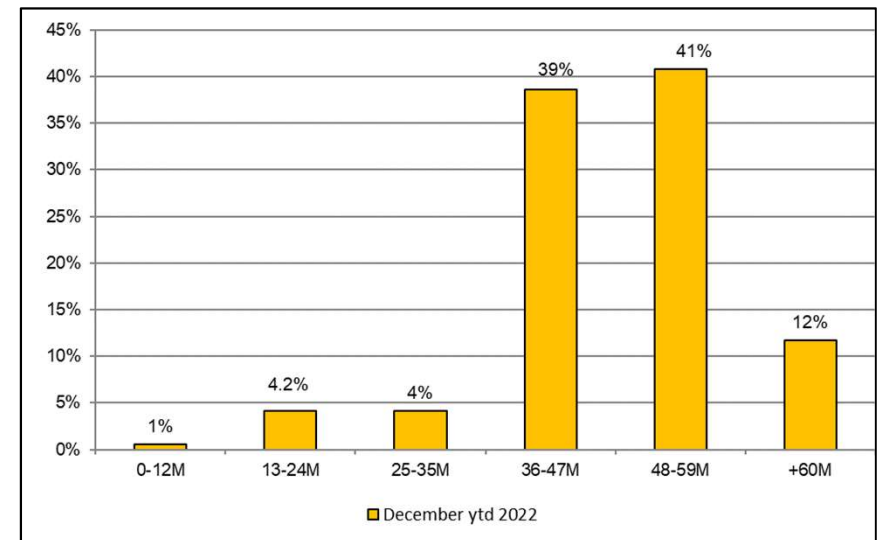

2

EARNINGS VISIBILITY : MULTIYEAR CONTRACTS PROVIDE HIGH EARNINGS PREDICABILITY

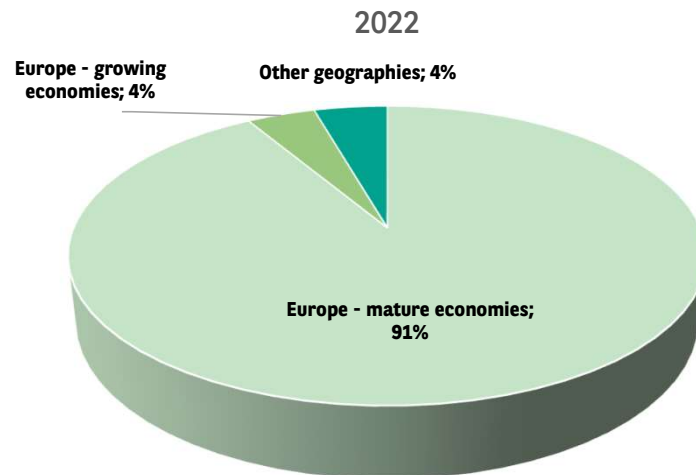

- Vehicles are leased on a long term basis which gives high visibility on revenues
 - Average duration of contracts is **42 months**
 - Almost all contracts with a duration at origination above 1 year
 - 92% of contracts with a duration at origination > 3 years

- Capacity to extend contracts in a context of crisis: reduction of deliveries can be compensated to a large extent by reduction of de hires
 - 65 000 additional extensions realised during covid crisis translating into less de hires
 - Win win situation for customer and Arval

Maturity of contracts at origination

EARNINGS VISIBILITY : VAST MAJORITY OF FLEET IN MATURE EU MARKETS

3 HIGH QUALITY ASSET PORTFOLIO: EXPOSURE BY RATING

- Arval client portfolio has a very good credit profile with the Investment Grade part (internal rating from 1 to 5) amounting to 55% of total exposure at Q4 22
- 1/3 of the portfolio is the equivalent of BB (rating 6 & 7), which let only a very small part (5%) rated B and below (8-10)
- Arval portfolio is not concentrated per client: Top 10 Business Group clients (other than BNPP Group) represent around 7.7% of the total exposure at 31 December 22. Top 20 represents 11,7% of total exposure.
- Arval applies the global rating policy of BNPP Group, adopts systematically BNPP ratings for shared clients with the Bank and achieves systematically annual internal rating review
- Total overdues (excl litigation) represent ~1% of the portfolio
 - This figure has been quite constant over the last 2 years, with an increase during lockdown period and a return back to more usual level since summer 2021
 - Part of the overdues have technical root cause and do not represent a high potential of loss
 - During Covid lockdown a weekly monitoring has been implemented by type of client with systematic report at ExCo level

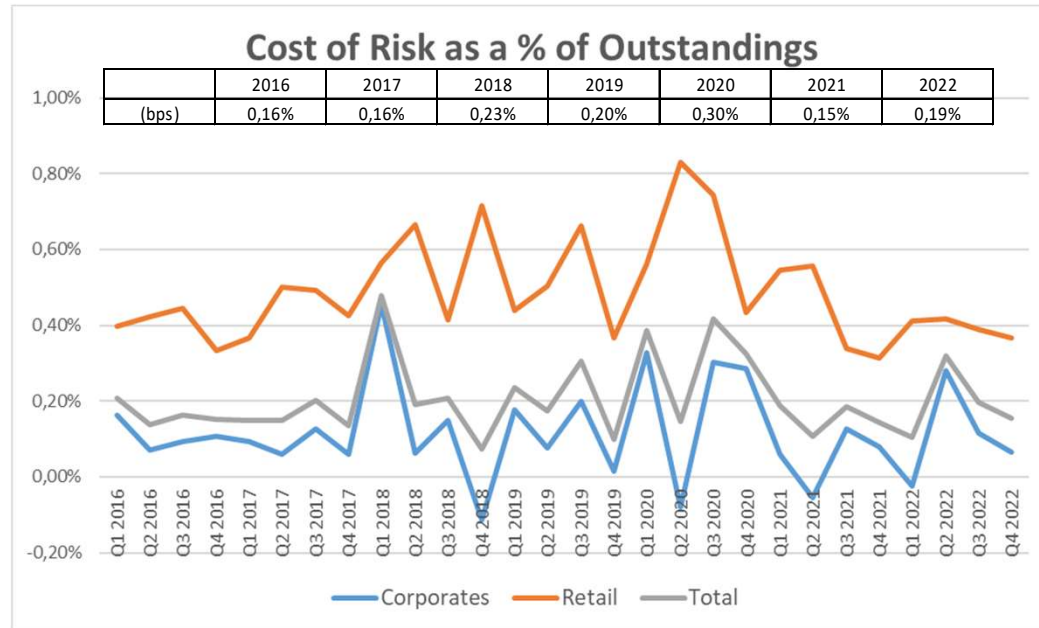

Quality Exposure at Q4'22

3 HIGH QUALITY ASSET PORTFOLIO: CONSERVATIVE PROVISIONING POLICY

- Arval's business has an overall low credit risk: around 20bp, increased to 30bp in 2020 due to Covid but returned at pre-covid Level in 2021 and 2022
 - Corporate clients usually pay their rental even if they face difficulties as they need the vehicles for their activity. So CoR is generally low for this segment (around 10bp)
 - Credit risk is higher in the retail segment (slightly above 40bp)
 - Arval remains owner of the vehicles and can get them if the rental is not paid

- Doubtful ratio decreased at 0,71% as at the end of year 2022 vs 0.80% as at the end of December 2021.

Total Arval CoR (consolidated entities)

4

OPERATING FLEXIBILITY: NO COMMITMENT TO OEMS FOR NEW CAR PURCHASES

- Vehicle is purchased once the order from the client is booked
 - Very limited risk overall to have non leased new car
- No commitment to OEM's on annual volumes
 - As Arval orders > 400.000 cars per year, it has a significant purchasing power
- As Arval is a multi-brand leaser and works with many OEM's, full flexibility for Arval on vehicles purchases
 - There can be some commitments for purchases of limited volumes in case of dedicated short term campaigns (subject to a special deal committee approval)

5

RESILIENT EARNINGS – OVERALL LIMITED COVID IMPACT IN 2020

- Very good resilience during the Covid crisis in 2020:
 - Lease Contract Margin and Lease Service Margin: positive impact of geographical & income diversification (eg. good performance of insurance) as well as contract extensions
 - Car Sales Results: good evolution of the used car market in 2H20 with good demand for used cars
 - Opex: very limited evolution (+1.3%) compared to fleet evolution (+6.4% vs 31.12.19) thanks to capacity to generate savings
 - Cost of risk: +23M€ ; contained increase thanks to cautious origination policy

 - An impairment test is also realised on a quarterly basis
- Strong governance of the whole process with well documented methodologies

75% OF FUNDING PROVIDED BY BNP PARIBAS

- Arval's funding is currently almost fully provided (~75%) by BNPP Group
 - Some local funding might be provided locally by third party banks in some emerging markets
- BNP Paribas' funding is senior unsecured
- Funding maturity is based on leasing contracts maturity
 - Funding is provided by BNPP Group through bullet or amortizing loans
 - Funding maturity is typically 3-4 years
 - Average debt maturity is therefore appropriately spread within the 3-4 coming years
- New capital markets instruments implemented
 - Bonds (EMTN)
 - Cash Securitization
 - Commercial paper
- Bonds' characteristics
 - Senior unsecured
 - Issued by Arval Service Lease

CAUTIOUS LIQUIDITY AND FINANCIAL MANAGEMENT

- Being part of BNPP Group, refinancing by BNPP of its loans to Arval is ensured
- In terms of liquidity buffer, Arval has >2 bn€ immediately available credit facilities
 - 1 bn€ with BNPP Group through permanently available buffer
 - 1 bn€ through revolving credit facilities with 5 international banks (3 year tenor)
 - 4.5 bn€ of cash as stock of orders is already financed
- If needed, fleet growth can be easily reduced
 - Eg. reducing fleet growth from 7% to 3.5% per year would reduce funding needs by 1 bn€ per year
 - As ~25% of lease contracts mature in a year, capacity to reduce quickly funding needs if necessary
- Conservative financial policy
 - Funding is based on fixed rate loans (as leasing contracts granted to clients): low interest rate risks
 - FX risk is very limited
 - Loans are in the same currency as the leasing contacts with clients
 - About 75% of funding is in euro, 12% in GBP, 10% in other currencies (PLN, NOK, SEK...) including external funding raising: same split on liabilities and asset side
