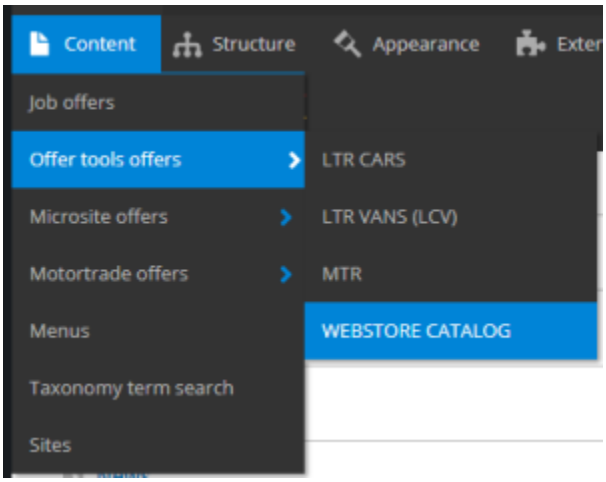
# Offer

## Import with webstore

Offers can be imported from a tool named "Webstore".

Note that only LTR & LCV offers can be imported.

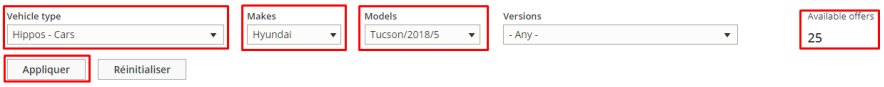
For this go here on the menu to access the webstore interface:



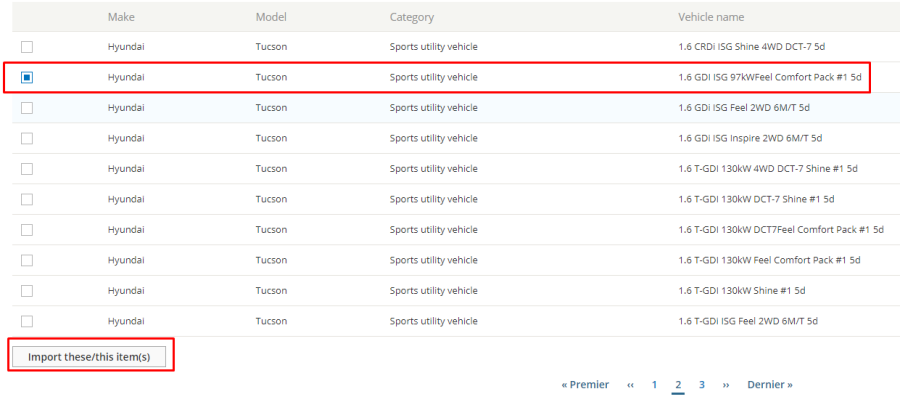
Then you must follow the select button to find the desire Brand & Model.

Example if I search the Hyundaï Tucson vehicle:

I apply the three first level and click on apply to have the detail list



Now I search the corresponding vehicle name. Click on the box and import it:



We can now go on the offer page to see it. Here we have imported an LTR offer:
