# Link the webform to Salesforce API

Creating the webform

When creating the webform make sure to put the corresponding **key** to your element.
All informations about the key are stored in the provided PDF: **Mapping Drupal - Salesforce.pdf**

**To link a new webform to an offer a Jira ticket will be necessary**

Once you have saved the element you cannot edit the key anymore

Hidden fields creation

Some hidden elements must be created for the lead on Saleforce side.

Submit button(s)	actions	Submit button(s)	11 ▾	Edit ▾
lead_record_type	lead_record_type	Hidden	12 ▾	Edit ▾
Privacy_Consent_grant__c	privacy_consent_grant__c	Hidden	13 ▾	Edit ▾
lead_segment	lead_segment	Hidden	14 ▾	Edit ▾
lead_channel	lead_channel	Hidden	15 ▾	Edit ▾
lead_source	lead_source	Hidden	16 ▾	Edit ▾
webtolead_source	webtolead_source	Hidden	17 ▾	Edit ▾
lead_origin	lead_origin	Hidden	18 ▾	Edit ▾
lead_campaign_id	lead_campaign_id	Hidden	19 ▾	Edit ▾
offer	offer	Hidden	23 ▾	Edit ▾
lead_offer_id	lead_offer_id	Hidden	24 ▾	Edit ▾
legal_notice	legal_notice	Hidden	25 ▾	Edit ▾

Make sure to put the good **value** to your element:

All informations about the hidden elements and values are stored in the provided PDF: **Mapping Drupal - Salesforce.pdf**

Synchronization to Salesforce API

- Go on settings => Salesforce
- Enable the synchronization
- Put the lead source: Arval website
- Save
