

Geolocation - How to manage taxonomy?

There are 3 types of taxonomies to be manage for geolocation in Drupal:

To manage the taxonomies, in Drupal menu, go to Structure > Taxonomy

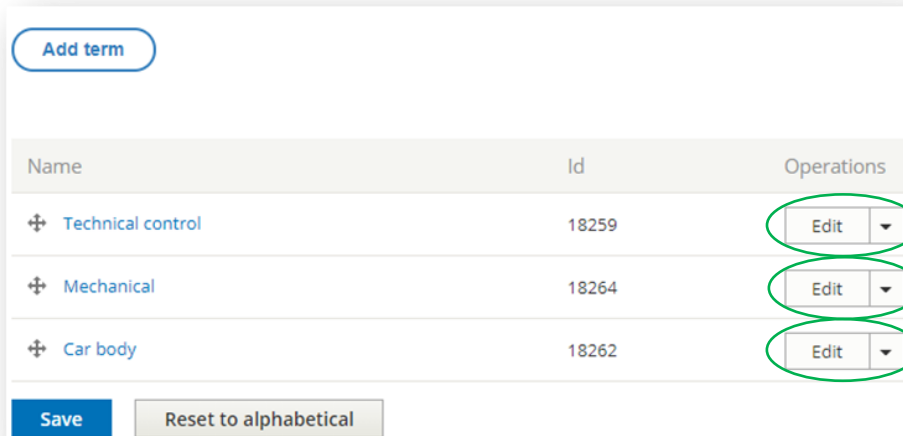

1. Supplier activity

Here you will find the list of garage activities that you have imported with the Excel file.

You will have to associate brands and activities manually.

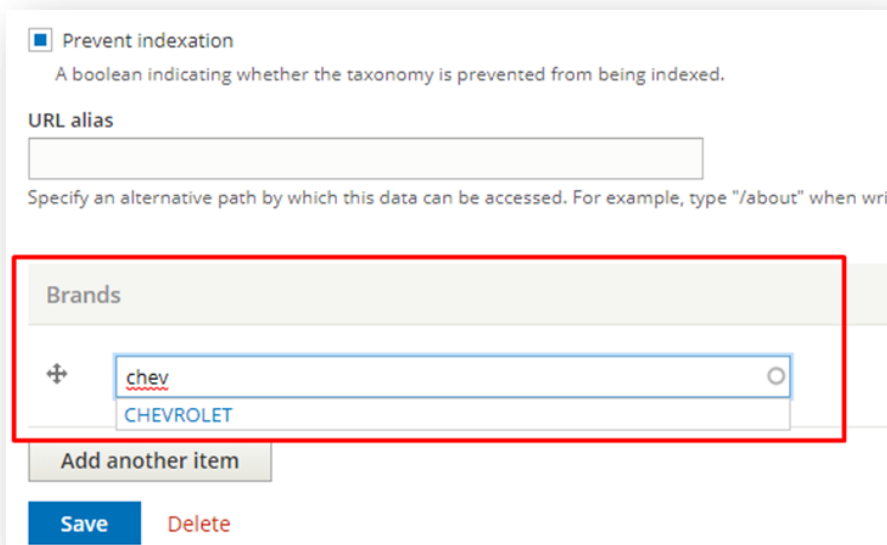

For that, click on *Edit* in the end of the line for each activity:

The screenshot shows a table with three columns: Name, Id, and Operations. The 'Operations' column contains 'Edit' buttons for each row, which are circled in green. Below the table are 'Save' and 'Reset to alphabetical' buttons.

Name	Id	Operations
+ Technical control	18259	Edit
+ Mechanical	18264	Edit
+ Car body	18262	Edit

Then, in the field named *Brand*, search for the brand (already existing according to the Excel file imported) and add all the brands linked to that service, one by one.

The screenshot shows a form with a 'Brands' section. A search input field contains 'chev' and 'CHEVROLET' is displayed below it. The 'Brands' section is highlighted with a red border. Below the search field is an 'Add another item' button and 'Save' and 'Delete' buttons.

Prevent indexing
A boolean indicating whether the taxonomy is prevented from being indexed.

URL alias

Specify an alternative path by which this data can be accessed. For example, type "/about" when writing

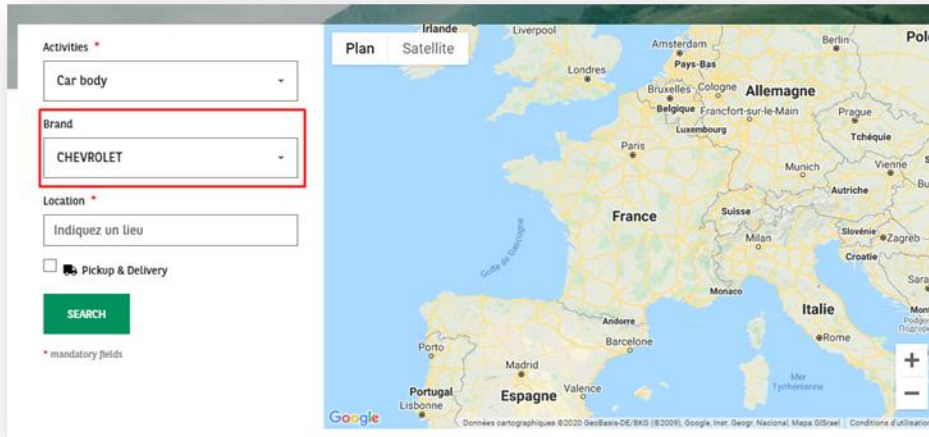

Brands

+ chev
CHEVROLET

Add another item

Save Delete

As a result of this action, on the website, a new field named *Brand* appears when the user selects an activity, linked to the brands as you configured in Drupal.

2. Supplier brand

You will find here the list of brands that you have imported. No need to edit this part.

Name	Id	Operations
+ AUDI	18258	Edit ▼
+ CHEVROLET	18265	Edit ▼
+ JEEP	18266	Edit ▼

3. Supplier typology

This is the list of the typologies of garage.

You will have to associate pictos for each typology of garage manually.

For that, click on *Edit* in the end of the line for each typology:

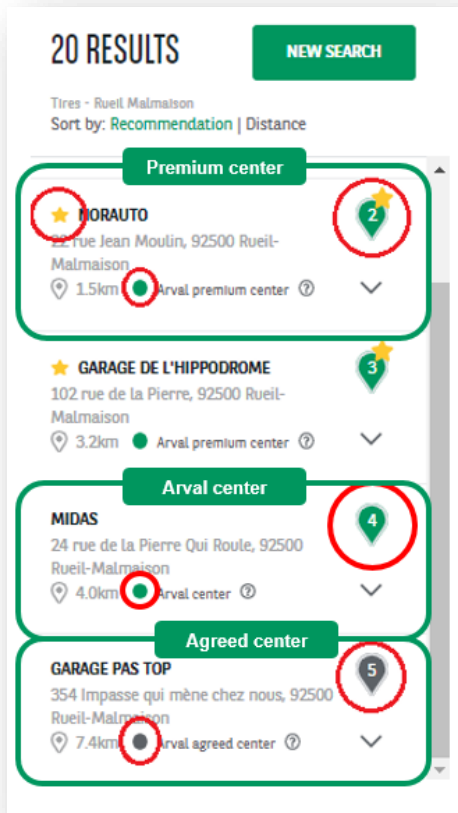

Name	Id	Operations
✚ Arval priority center	18260	Edit ▾
✚ Arval center	18261	Edit ▾
✚ Arval approved center	18263	Edit ▾

Then, search for the parameters below

- Pointer Picto 
- Bullet Picto 
- Prefix Picto 

▶ POINTER PICTO
▶ BULLET PICTO
▶ PREFIX PICTO

You should edit them according to the rules explained below:

a) Premium Center

- Green Arval Pointer Picto
- Green Arval Bullet Picto
- Star Prefix Picto

b) Arval Center

- Green Arval Pointer Picto
- Green Arval Bullet Picto
- NO Prefix Picto

c) Arval Agreed Center

- Grey Pointer Picto
- Grey Bullet Picto
- NO Prefix Picto

The next step is *How to configure paragraph*.
